

Report (ICICI)

Generated At: Tuesday 20-Jan-2026 06:03:26 pm IST

REPORT FROM: Mon_19-Jan-2026 12:00 am | TO: Tue_20-Jan-2026 12:00 am

1. Application Url Uptime

- 1.1 Display the average URL uptime for the report's time range
- 1.2 Show downtime percentage with 10-minute timestamp intervals

2. Cpu Usage

- 2.1 Show Current CPU usage
- 2.2 Show timestamps when CPU usage exceeded the threshold for over 5 minutes
- 2.3 Show detailed CPU usage with threshold timestamps

3. Memory Usage

- 3.1 Show Current MEMORY usage
- 3.2 Show timestamps when memory usage exceeded the threshold for over 5 minutes
- 3.3 Show detailed memory usage with threshold timestamps

4. Cpu Load Average And System Uptime

- 4.1 Display current cpu load average
- 4.2 Display the average CPU load average for the specified report time range
- 4.3 Display current SYSTEM UPTIME

5. Disk Usage

- 5.1 Display current disk usage percentage along with average usage for each mount point

From: 19-Jan-2026 12:00:00 am | To: 20-Jan-2026 12:00:00 am

Section A: APPLICATION URL UPTIME

1: Overall average URL uptime percentage for the specified report time range

URL	Average Uptime
No Data Available	

2:Timestamp when application URL uptime dropped below 100%

URL: No Data Available	
Timestamp	Uptime Percentage
No Downtime	

3: Detailed records of application URL uptime percentage for the specified report time range

URL: No Data Available	
Timestamp	Uptime Percentage
No Downtime	

Section B: CPU USAGE

1: Current CPU Usage Details (20-01-2026 06:03 pm)

IP Address	System (%)	User (%)	IO Wait (%)	Steal (%)	Nice (%)	Total (%)	Idle (%)
No Data Available							

2. Time range where the CPU usage exceeded the 80% threshold continuously for over 5 minutes.

IP Address	Start At	End At	Avg (%)	Max (%)
No threshold exceeded				

3. Timestamp when CPU usage exceeded the 80% threshold

Timestamp	User (%)	System (%)	Total (%)
No detailed data available			

Section C: MEMORY USAGE

1: Current MEMORY Usage Details (20-01-2026 06:03 pm)

IP Address	Used (%)
No memory usage data available	

2. Time range where the MEMORY usage exceeded the 80.00% threshold continuously for over 5 minutes.

IP Address	Start At	End At	Avg (%)	Max (%)
No servers reached the threshold				

3. Timestamp when MEMORY usage exceeded the 80.00% threshold

Timestamp	Swap Memory %	Actual Memory %
No detailed memory records available		

Section D: CPU LOAD AVERAGE AND SYSTEM UPTIME

1: Current Load Details (20-01-2026 06:03 pm)

IP Address	Load 1m	Load 5m	Load 15m
No Data Available			

2: Average Load Details for specified report time range

IP Address	Load 1m	Load 5m	Load 15m
No Data Available			

3: Current Uptime Details (20-01-2026 06:03 pm)

IP Address	Uptime
No Data Available	

Section E: DISK USAGE

1. Disk Usage Details for server based on mount point (20-01-2026 06:03 pm)

IP Address	Filesystem	Mount Point	Used %
No Data Available
